WHAT THE TELEPHONE PEOPLE SAY. Mr. Murray, manager of the telephone empany, was seen last evening. He said

that there seemed to be a misunderstanding among the patrons. The letter submitted in answer to the protest, stated that a reduction would be made from the proposed prices, and that if this was not satisfactory it was hoped the subscribers would notify the company. So far, but seven instruments had been taken out, and all these were upon direct orders, and after the issuance of the second circular.

All of which simply means, that those who now desire their instruments removed must send in another notice to that effect.

AN OCEAN STEAMSHIP POOL.

An Agreement for the Regulation of Ocean Traffic Being Considered.

Special to THE HERALD-Examiner-Cable.] London, April 2 .- It is difficult to find out anything definite about the conference held a short time ago between two of the German and some of the English lines running steamers to New York with a view to establish an agreement, or what perhaps may be more properly called a trust, for the regulation of ocean traffic. But another and more general meeting has

But another and more general meeting has been arranged at Antwerp for something this month, which will probably result in important announcements. The combination can hardly bring about any advances in freight rates unless the small lines running from London to Liverpool are taken into' the scheme, but it may result in a considerable advance for passenger rates on the faster steamers. It costs a lot of money to run an ocean greybound. This summer there will be three more of them affout and the record is sure to be lowered. The City of Paris, before her m.sfortune, had not been pushed to anything like her best speed. When she made her fastest westward run her speed was purposely dropped from 22

Engineers Say it Has Sunk Fight Feet-The Goddess of Liberty in Danger.

[Special to THE HERALD-Examiner Dispatch.] New York, April 2 .- It is reported that Bedloe's island is slowly sinking into the waters of New York bay. A suspicion that such was the case has existed in the minds of those conversant with the locality for the past year. An examination by a few practical engineers during the past few days confirms this behef and leaves go doubt, it is said, that the statute of Liberty is eight feet lower than when erected. Bedloe's island is a rock, and was supposed to be as enduring as the world itself and would be were it not for the fact that it is the extreme of a grown was about under would be were it not for the fact that it is
the extreme of an enormous shelf underneath which is a bed of quicksand which
extends across this section east and west.
The Central railroad of New Jersey crosses
it at one point, and it has been the cause of
an immense amount of trouble and work to
that corporation to keep its track above
ground. It is thought that the part of the
shelf of rock which forms the island has
broken off, and the rock foundation of the
statue is slowly but surely sinking out of
sight in the waters of the bay. Of course
the cause of the breaking of the rock shelf

The Mexican Congress Opened.

CITY OF MEXICO, via Galveston, April 2.-Both houses of congress opened last evening. President Dlaz' message was received. He says good effects will follow the deliberations of the Pan-American conference for the new world, and the Maritime congress at Washington for the nations at large. The message refers to the apology of the United States for the slighting remarks of Consul Misener when he presented his credentials to Costa Rica. He states that the United States promised to take into consideration the protest of Mexico against bringing the Apache prisoners near the Mexican frontier.

The government at Washington, the message says, refused to consider the proposition of the Los Angeles chamber of commerce for the acquisition of Lower California. the deliberations of the Pan-American con-

fornia.

His excellency draws attention to the decisions of the United States court in the matter of the fraudulent Abraham Well claims, and says the last installment of the debt to the United States was paid January last. It is expected, however, that part of this money will be retunded, owing to the bogus nature of some of the claims.

Diaz says he will encourage railroad building. The progress of work done in this direction and the development of telegraph and postal facilities are summarized. The financial condition of the republic is declared to be flourishing, and Mexico's credit abroad is stronger than ever before. The message recommends a retrenchment The message recommends a retrenchment in the expenses of government.

let has definitely decided to apply for a divorce from his wife, the late Emily divorce from his wife, the late Emily Schaumberg, of Philadelphia. The proceedings will be based on Mrs. Hughes Hallet's alleged misconduct with Mr. John Chandos. Colonel Hallet shows papers and affidavits of a detective whom he employed as a butler. Hallet confronted his wife with his butler's affidavits and a terrific row took place. Mrs. Hallet packed her trunks and left for the continent. She is still supporting Chandos, who is at Monte Carlo enjoying himself gambling and spending money freely, although with no other means of support. The case will soon come before the public.

Special to THE HERALD-Examiner Dispatch.] COLUMBUS, O., April 2 .- Governor Camp bell yesterday pardoned Samuel White, a life prisoner, from the Ohio state prison. life prisoner, from the Ohio state prison. There is a poculiar story connected with his imprisonment. His crime was murder and he was intoxicated when he committed it. He was conviced in 1871. Governor Foster pardoned him in 1881 on condition that he should never drink intoxicating liquors. He observed this condition until last summer, when he began a terrible jamboree and frightened all Portsmouth. For this he was brought back to prison. Governor Campbell now pardons him under the same conditions.

Russell Wheeler & Sons Co. and Gilbert & Hart Furnaces are safe, effective, economical, reliable. It is considered by students of the matter that hot air is the cheapest, safest and most satisfactory method of heating that can be used in Salt Lake city, it appearing that the alarming deposit of lime in pipes used for steam or hot water makes them neither safe nor effective.

The two Furnaces we are offering are known to be as good as any made. We have a practical furnace man, who has been setting these furnaces for ten years, and it is well understood that the best Furnace made, set by an inexperienced man, will not operate satisfactorily, hence it is very important to have an experienced mechanic for this work.
